Bodo's Wide Bandgap Event

Meet the Top Experts for SiC and GaN

Bodo's WBG event returns to the Hilton Munich Airport on December 3 and 4, 2024. We are very excited to organize and host an in-person event again!

On the first day, we will start the event with the opening roundtable at 4pm. After a brief welcome, I will discuss with my guests the hurdles that need to be overcome to design in WBG semiconductors today and to increase the adoption rate of SiC and GaN devices. Of course, the panelists will once again be real experts from top technology leaders.

On the second day, we will run two tracks in parallel, one for SiC and one for GaN. In the already well-proven manner we will ignite a kind of firework of SiC and GaN technology presentations to inspire the audience. As we at Bodo's Power Systems know, networking and the possibility to meet the experts (companies) are some of the main benefits of an event like this, we have planned enough time for breaks and the exchange of information. Therefore, all participants of Bodo's WBG event will have the chance to get in direct contact with both the expert speakers and the exhibitors of the table-top exhibition in the foyer.

This is a great opportunity for you to present your products and solutions to a highly-specialized audience. As you know the visitors are real design engineers and other specialists in the power electronics industry.

Get in touch with our team in order to become a sponsor or exhibitor of Bodo's WBG event! The exhibition space and, consequently, the number of tables is limited; sales will be on a first come, first serve basis. Furthermore, we offer special sponsorship opportunities including hosted catering, conference gifts and lanyards. Just contact us and we will find a solution that fits to your needs. Holger will be your first port of call.

I look forward to seeing you in Munich!

Best regards,
Bodo
